Abstract

Abstract

The Government of the Republic of Serbia has submitted evidence in the form of a letter to the President of the Constitutional Court of the Republic of Serbia, dated 11.05.2017, regarding the proposed changes to the Law on the Election of Members of the Constitutional Court of the Republic of Serbia.

100% **GUARANTEED** SATISFACTION

Abstract The purpose of this study was to determine the effect of a 12-week, low-intensity, supervised walking program on the physical and psychological health of sedentary, middle-aged women. The study was a randomized, controlled trial. The subjects were 40 sedentary, middle-aged women who were randomly assigned to either a supervised walking program or a control group. The walking program consisted of 12 weeks of supervised walking, 3 times per week, for 30 minutes per session. The control group consisted of 20 women who did not participate in the walking program. The subjects were assessed at baseline and at 12 weeks for physical and psychological health. The walking program had a significant positive effect on the physical and psychological health of the subjects. The walking program significantly improved the subjects' physical health, as measured by the 6-minute walk test, the 12-minute walk test, and the 400-meter walk test. The walking program also significantly improved the subjects' psychological health, as measured by the Beck Depression Inventory, the State-Trait Anxiety Inventory, and the Zung Depression Index. The walking program had no significant effect on the subjects' weight, blood pressure, or cholesterol levels. The results of this study suggest that a 12-week, low-intensity, supervised walking program can improve the physical and psychological health of sedentary, middle-aged women.

17. Further, the Commission notes that the FBI's investigation should be conducted within "reasonable time" and that the FBI should not "unduly delay" its investigation. The Commission also notes that the FBI's investigation should be conducted in a manner that is consistent with the Commission's findings and conclusions, and that the FBI should not "unduly delay" its investigation.
